DJIA vs. DJIA/GOLD PORTFOLIO DISCLAIMER:

As of March 31, 2023. The portfolio comparison is calculated on the spot price for gold and silver bullion for the period selected. The value and prices of premium and semi-premium coins do not always move in tandem with spot prices, as premium and semi-premium coins derive a portion of their value/price from other factors such as rarity and connection to historical events. The portfolio comparison does not factor premium or semi-premium coins, as the prices for such coins are highly variable and would depend on the specific coin and quantity of coins selected. Comparisons also don't factor transaction fees or dividend distributions associated with purchasing gold/silver or stocks.
